Hi,

My name is Chris from Creation Crate

,
which is a company that teaches and inspires people to make while learning
how to build Arduino-based electronics projects.

Like you, we want to spread the joy of discovery, learning, and making.
So, we're launching Creation Crate 2.0 on Indiegogo in November. It will
include cutting-edge features like augmented reality and a new digital
classroom. You can see the pre-launch page here: www.mycreationcrate.com

.

*We're also trying something new with our campaign. We** need your help to
reach as many interested people as possible. At the same time, we'd like
to give back to organizations like Eugene Maker Space who share our
vision. *

We would like to create an exclusive reward in our Indiegogo campaign for
Eugene Maker Space. Here's how it works:

We'll send you a special link for you to send to your members and friends.
As they support us, we'll give back to you. For every 5 members who pledge
with one of our subscription packages, we'll send your organization a
Creation Crate Ultimate Maker Kit. This reusable kit contains the first 12
months of Creation Crate projects (valued at \$420 in our Indiegogo
campaign) with access to our online teaching resources.

All you need to do join in is enter your name, email, and mailing address
in the form below.

Help us inspire the next generation of makers!

Best,
Chris & the (small) Creation Crate team.

Hi,

Just following up in case you missed my previous email. Let me know if you have any questions!

Best,
Chris

Hi,

Just following up one more time. I think our kits would be valuable to Eugene Maker Space!

Best,
Chris
